3. Comments

3.1) What did you like best about this class?

- Broad topic coverage. Awesome in depth exposure to tough topics in many fields. Required to complete tough projects using all the skills acquired
- Nothing
- Really neat subject matter with some interesting homework assignments. On Intelligences was a great book for the class.
- The class was interesting and gave me a high level overview of computer vision and processing of files. It would be great to be able to get more in depth on these things.
- The lectures were effective and entertaining. The projects and homework were easily the the most engaging, interesting and challenging work of any class I have taken.

3.2) What did you like least about this class?

- Everything
- Instructors and TA never graded any homework for the class.
- Papers and readings need a little updating. Would have liked to receive at least one grade or feedback on work I am doing in class. This would have been very helpful.
- The homework assignments were too long. Although they were educational, they were hard to complete on time.
- The pace was very fast and the workload was very high. I wish I could have gotten more feedback (grades?) so I knew if I was in the right track.

3.3) Please add any additional comments.

- He has too much work, little to no actualuseful materials to help us do the work he assigns. This class has two classes worth of work. We also haven't received a single grade to date.
- I think this class has really pushed me, and the content is exceptionally interesting and enganging. The workload is high enough and the amount of material is voluminous enough that I think this could easily be tought as two classes. The instructor and TA were responsive and respectful in all questions and interactions. I just wish I knew if I was keeping up or drowning. I don't doubt the readings are seminal, but they have been extremely dense and challenging, and in my opinion go into more detail sometimes than required by the homework. I suppose it is still valuable to be exposed to them.
- Show more respect for the online students. We pay just as much for the class. Also, it would be nice if we received any feedback. (Didn't receive any grades back or homework assignments)
- Thank you so much for a thought provoking course. It was extremely exciting. exactly what I wanted from grad school....if I passed
