# Destruction

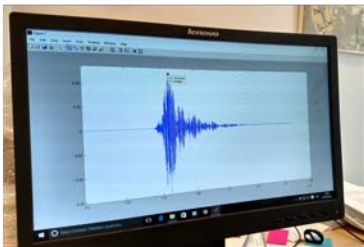

# Structural Dynamics Laboratory

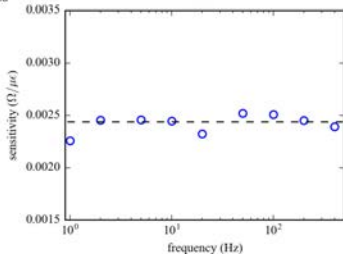

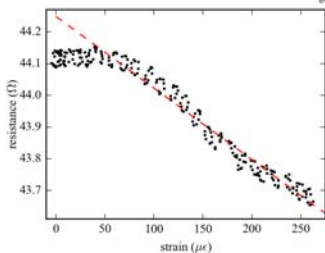

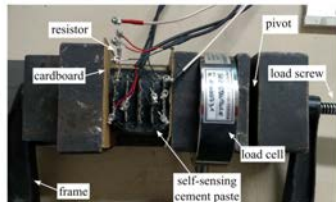

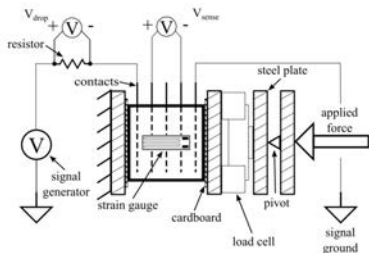

Dynamic testing of a strain-sensitive cement sample. Austin Downey

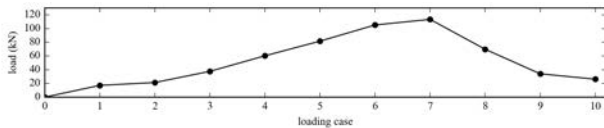

# Monitoring the bell tower of San Pietro

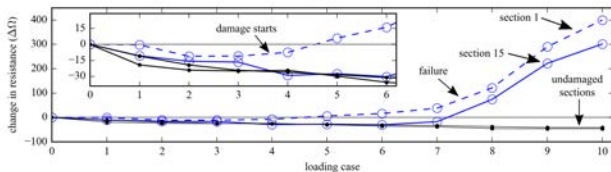

# Strain sensing structural materials

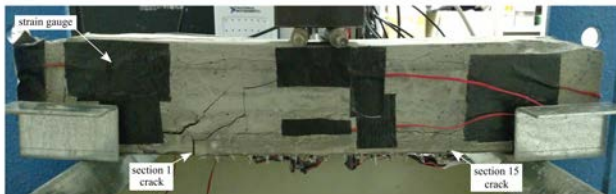

# Damage detecting structural materials

(a)

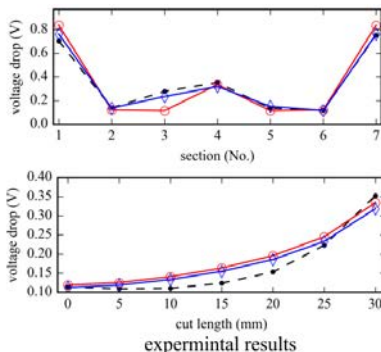

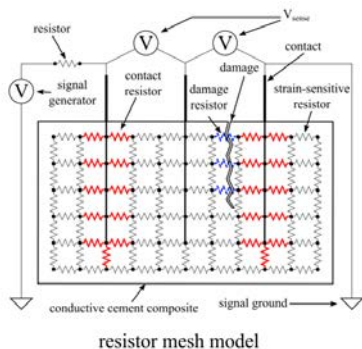

(b)

(c)

# Damage detecting models for self-sensing structural materials

## Very successful research experience!

- Theoretical and experimental work.
- Built productive working relationships.
- Experienced different working environments.
- 11 co-authors from 4 institutions and 3 nations
- Set up a materials testing laboratory.
- Ate a lots of pasta.
- I bought three hats.
