RESEARCH BACKGROUND

RESEARCH BACKGROUND

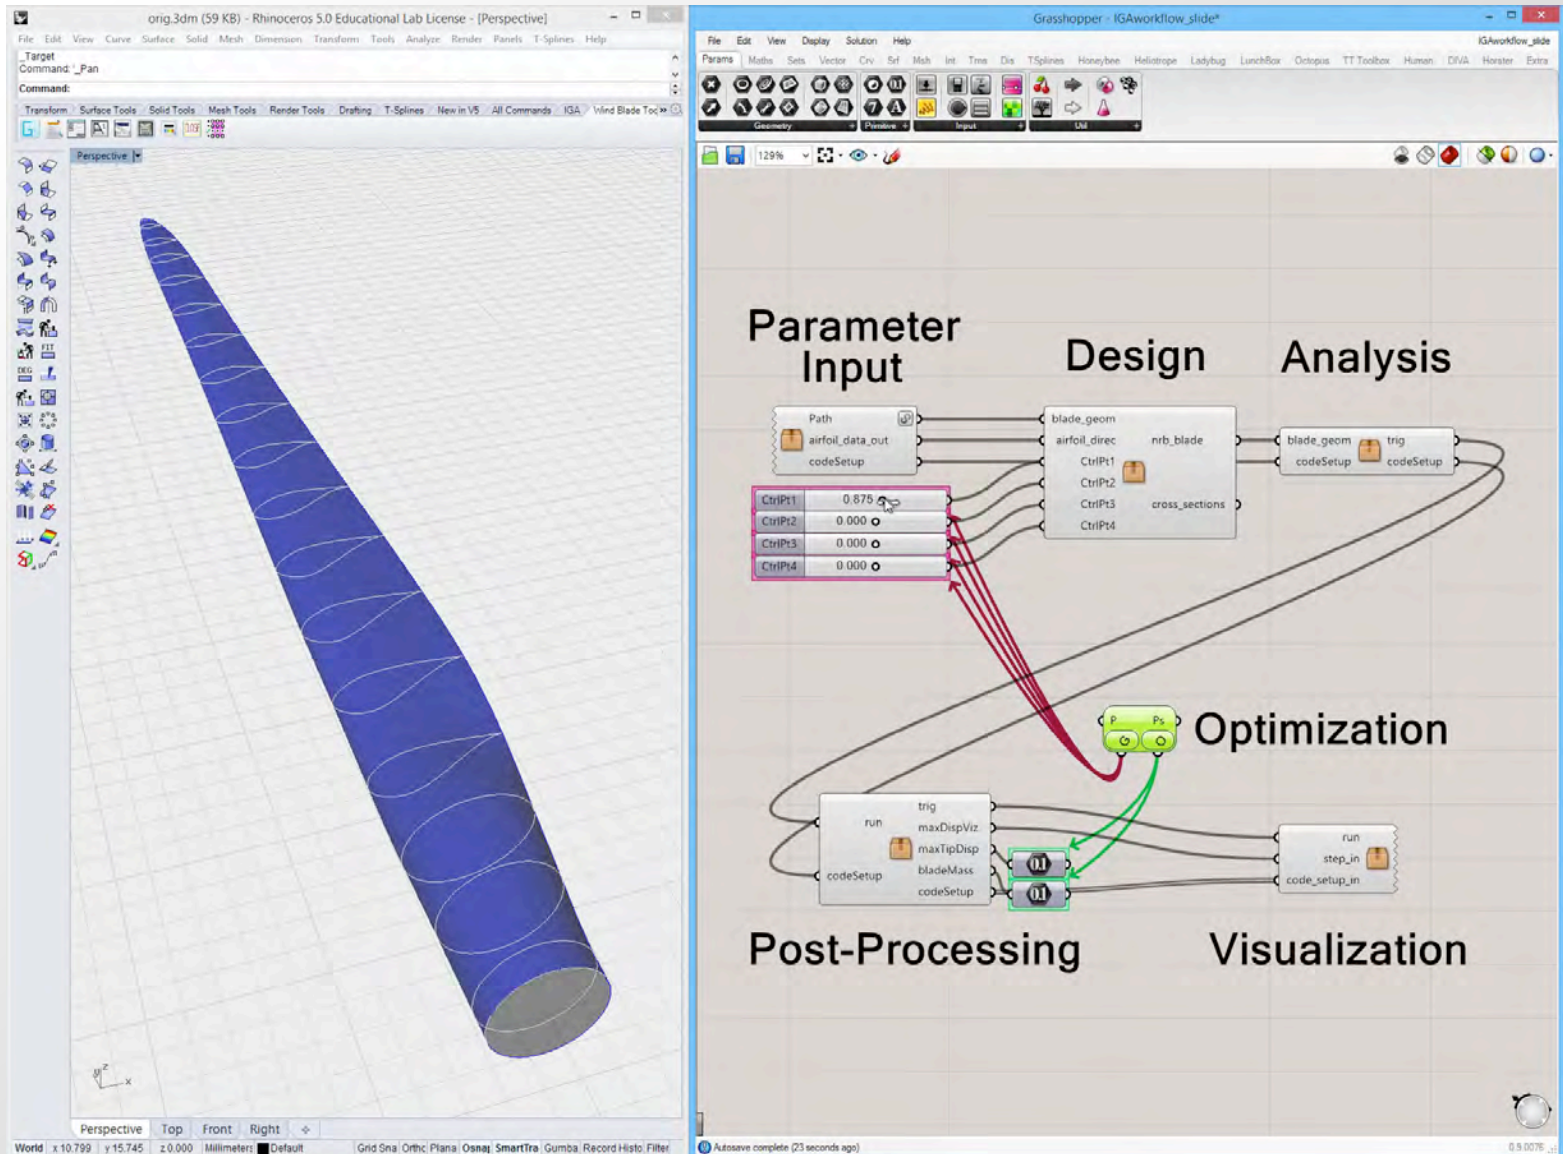

RESEARCH BACKGROUND

Loads from **FAST** – no-shear, 11.3 m/s wind

- **Power** prediction given by NREL's **FAST**
- MATLAB's **pattern search** algorithm drives optimization

RESEARCH BACKGROUND

Design	Func. Evals	Tip Defl. (m)	Max. Strain	Mass (kg)	Power (kW)	$\mathcal{J}_b(\mathbf{y}; \mathbf{x}_b)$	Add. Profit (millions \$)
Original	–	5.75	0.0083	40,912	5,265	100.00%	–
Case 1	128	5.75	0.0100	41,650	5,302	99.49%	6.37
Case 2	102	5.12	0.0083	43,265	5,311	99.78%	2.75

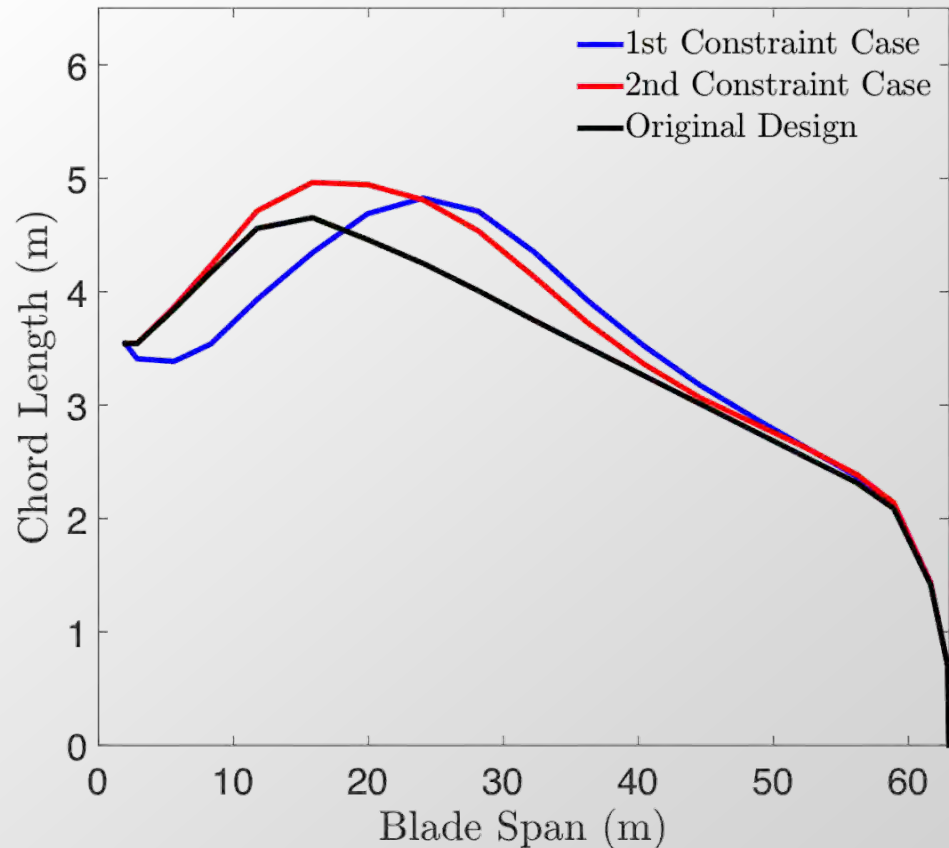

Optimization 1: Tip deflection constrained

Optimization 2: Tip deflection and strain constrained

RESEARCH BACKGROUND

Design	Func. Evals	Tip Defl. (m)	Max. Strain	Mass (kg)	Power (kW)	$\mathcal{J}_b(\mathbf{y}; \mathbf{x}_b)$	Add. Profit (millions \$)
Original	–	5.75	0.0083	40,912	5,265	100.00%	–
Case 1	128	5.75	0.0100	41,650	5,302	99.49%	6.37
Case 2	102	5.12	0.0083	43,265	5,311	99.78%	2.75

Proof of concept—can't trust these results!

- **Blades don't have shear webs**
- **Analysis is performed for only one wind condition**

INTERNATIONAL EXPERIENCE TIMELINE

- **Fall 2015:** Discussions with major professor, confirm interest with collaborator in Germany
- **Mid-December 2015:** Email DTU Section Head of Aerodynamic Design, Flemming Rasmussen
 - “...I am fully funded for this experience and would not require compensation...”
 - Response a week later, put in contact with senior researcher Frederik Zahle to find relevant project
- **February 2016:** Confirm AirBnB housing in Roskilde, Denmark
- **February 2016:** Purchase flights
- **March 2016:** Confirm university guest housing in Braunschweig, Germany
- **May 27, 2016:** Depart for Roskilde, Denmark
 - Approximately 7 week stay
- **July 15, 2016:** Take train from Roskilde to Braunschweig
 - Approximately 4 week stay
- **August 13, 2016:** Return to Des Moines

OTHER THINGS IN DENMARK

RESEARCH AT DTU

- Advanced computational blade design techniques
 - IEC standard-based rotor optimization—about 1000 load cases
 - 10 MW blade design
 - Close relationships with Siemens, LM, Vestas
- FUSED-Wind
 - Collaboration with NREL
 - HAWC2 or FAST
 - Development of programmatic wrapper for FAST

RESEARCH AT DTU

- Development of FAST wrapper for FUSED-Wind with Katherine Dykes (NREL) and Frederik Zahle (DTU)

RESEARCH AT DTU

- Parallel execution of FAST cases within OpenMDAO

```
# Setup input config dictionary of dictionaries.
cfg_master = {} #master config dictionary (dictionary of dictionaries)
caseids = ['case1', 'case2', 'case3', 'case4']
TMax = [30, 22, 40, 45]

for i in range(4):

    # Create dictionary for this particular case
    cfg = {}
    cfg['fst_runfile'] = '{0}.fst'.format(caseids[i])
    cfg['fst_rundir'] = os.path.join('./rundir/', caseids[i])
    cfg['TMax'] = TMax[i]

    # These parameters the same for all cases
    cfg['fst_masterfile'] = 'Test01.fst'
    cfg['fst_masterdir'] = './FST8inputfiles/'
    cfg['fst_exe'] = '../..../..../..../FAST_v8/bin/FAST_glin64'
    cfg['libmap'] = '../..../..../..../FAST_v8/bin/libmap-1.20.10.dylib'
    cfg['ad_file_type'] = 1

    # Put dictionary into master dictionary, keyed by caseid
    cfg_master[caseids[i]] = cfg

# Add parallel group to omdao problem, pass in master config file
root.add('ParallelFASTCases', FST8AeroElasticSolver(cfg_master, caseids))
```

RESEARCH AT TU BRAUNSHWEIG

$$W^p = \gamma \int_{\Gamma} \left(\overbrace{a_3^A \cdot a_3^B}^{\text{Deformed configuration}} - \overbrace{\dot{a}_3^A \cdot \dot{a}_3^B}^{\text{Undeformed configuration}} \right)^2 ds = 0$$

a_3 = normal unit vector

$$a_3^A \cdot a_3^B = \|a_3^A\| \|a_3^B\| \cos(\theta) = \cos(\theta) \quad (\text{angle between two patches})$$

$$\dot{a}_3^A \cdot \dot{a}_3^B = \|\dot{a}_3^A\| \|\dot{a}_3^B\| \cos(\dot{\theta}) = \cos(\dot{\theta})$$

RESEARCH AT TU BRAUNSHWEIG

Each gauss point:

- 1) Project curve gauss point to each patch
- 2) Calculate normal vectors
- 3) Calculate penalty contribution
- 4) Assemble to global degrees of freedom

SUMMARY

- Highly recommend taking advantage of opportunity!
 - Beneficial to research
 - Beneficial for networking
 - Beneficial to résumé/CV
- Creates opportunities to experience new places

Rome

*Malmö,
Sweden*

Berlin

London

TIPS

- Check with DTU if you're interested!
- Try to have a good idea of what work you will accomplish beforehand, but be flexible
- Don't be afraid to ask questions
- Travel insurance – Iowa State Study Abroad
 - Danette Bontrager
- Register trip with U.S. Department of State
 - step.state.gov
- Consider AirBnB for housing needs – good to have another local contact

Thank you!
