

Laboratory # 8
CE 326 Principles of Environmental Engineering

Alternative Assignment

If you were not able to attend the water treatment plant field trip, please write a 2-3 page report on one of the following:

- a current news article involving drinking water supply or treatment
- a current news article involving disease outbreaks associated with contaminated drinking water
- the possibility of using treated wastewater for drinking water
- pharmaceuticals in drinking water
- other current topic involving drinking water

Due date: March 26th for distance education students
